Thomas Lehmann

Project Director

Sustainable Consumption and Production for a Low Carbon Economy

Low emissions public procurement and Eco - Labeling

01. May 2013

Outline

- Who is GIZ?
- Introduction to the project
- How is the project connected to this event?
- Expected results of the regional networking meeting

GIZ profile

German International Cooperation (GIZ)

GIZ is a non-profit enterprise, which is fully owned by the German Federal Government. We operate in more than 130 countries worldwide. We are looking back on operations in Thailand for more than 55 years.

GIZ is an instrument of the German Government to facilitate international cooperation aiming for *sustainable development and international education work*. Sustainable development in its four dimensions (planet, people, participation, profit) is a key goal of German foreign policy.

GIZ also operates on behalf of public and private sector clients, both in Germany and abroad. Most commissions are from the German government, but include also international organizations and private multi-nationals.

Sustainable Consumption and Production for Low Carbon Economy – Low Emissions Public Procurement and Eco-Labeling (SCP4LCE)

This project is funded by:

Federal Ministry for the
Environment, Nature Conservation
and Nuclear Safety

Project Overview

Duration: 37 months, June 2012 – June 2015

Project office: c/o Ministry of Natural Resources and Environment,
3rd floor, Pollution Control Department,
Phahonyothin 7, Phayathai, Bangkok 10400, Thailand

**Project
Implementer:**

กรมควบคุมมลพิษ
Pollution Control Department

THAILAND
ENVIRONMENT
INSTITUTE

THE FEDERATION OF THAI INDUSTRIES

Objectives

To expand existing eco-labels in Thailand and in selected countries in Southeast Asia to cover climate protection criteria

To strengthen Green Public Procurement in Thailand

To cooperate with other selected countries in South East Asia regarding Green Public Procurement and harmonization of eco-labels

Expected Results of the regional networking meeting

Good practices and lessons learned in green Public Procurement are shared among the participants

Good practices and lessons learned in Eco-Labeling are shared among the participants

Draft next steps for regional cooperation on GPP and Eco-Labeling

Thank you !
